The Unique Radar Key Company Gold Standard Keys

Opens all the existing locks with the ultimate ease and reliability. Improved design, manufacturing and keycutting.

UNIQUE raised edges on smooth ergonomic handle for maximum grip and leverage - The opposite of having a thickened centre which tapers down to sharp edges

Two enlarged keyring holes allow the user to individually tailor the extra leverage available from their keyring and other keys on their bunch

One-piece SOLID BRASS keyblank eliminates the possibility of handle weakness or sharp weld-flash at this point

Octagonal shaft gives easy identification for partially sighted users.

SUPREMELY ACCURATE KEYCUTTING SUPREMELY RELIABLE KEYCUTTING

Our purpose built, computerised key cutting machines UNIQUELY allow extra machining operations, very specific rounding of the cuts and the tight tolerances which ensure reliable operation of our keys in all the locks

Bevelled keystone for smooth key removal

One-piece solid brass keyblank eliminates possibility of flag weakness or excessive weld-flash, which can obstruct key insertion

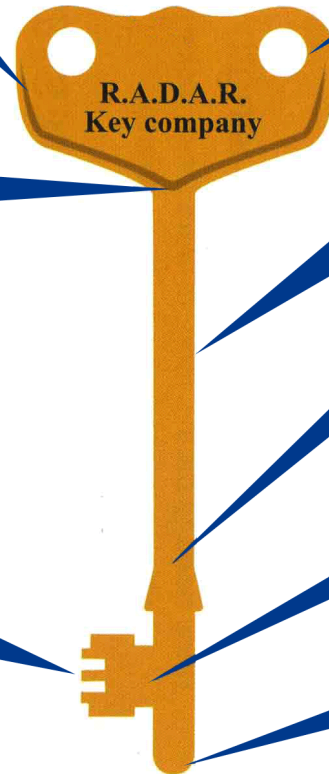

Fully rounded nose to aid easy insertion

DEPENDABLE BRITISH QUALITY CONTROL

Every single key is tested by a master locksmith on two Radar toilet locks (not the much simpler, Radar Padlock)

Disabled people depend on their Radar Key Company Gold Standard NKS key to certainly & effortlessly open what will be, the only accessible toilet which is nearby
